1.2. Overview

This guide covers:

- Introduction and access to the BDB Social Media Browser
- Steps to Create, Schedule, and Analyze Social Media Search terms

1.3. Target Audience

The current document aims at business professionals and data analysts who use BDB Social Media Browser to extract data from the popular social media sites and perform various business analysis.

2. Introducing the BDB Social Media Browser

2.1. Introduction to the BDB Social Media Browser

BDB Social Media Browser platform provides a common launchpad for searching, collating, and analyzing Social/Digital Media Data. It is a comprehensive solution to input a search term and fetches relevant data from various social media or e-commerce sites. Integration with BDB Dashboard Designer and BDB Sentiment Analyzer makes SMB a unique platform. SMB can visualize various analytical '**Key Performance Indicators**' (KPIs) based on sentiment and mood of a created search term. This social media search platform can be used to analyze time bound reviews about a product or perform competitor analysis to identify the significant influencers in Social Media Space.

2.2. Prerequisites and Supported Devices

- A browser that supports HTML5
- Operating System: Windows 7
- Basic understanding of the BDB Server
- SMB is a web-based application so; the only requirement is a browser.
- SMB can be viewed only in web browsers (Mobile and tablet views are not supported).
- Software should support HTML5.
- Users should be permitted to access SMB from the User Management module of the BDB Platform.
- Users should be permitted to access Dashboard Designer and Sentiment Analyzer plugins from the User Management module of the BDB Platform.

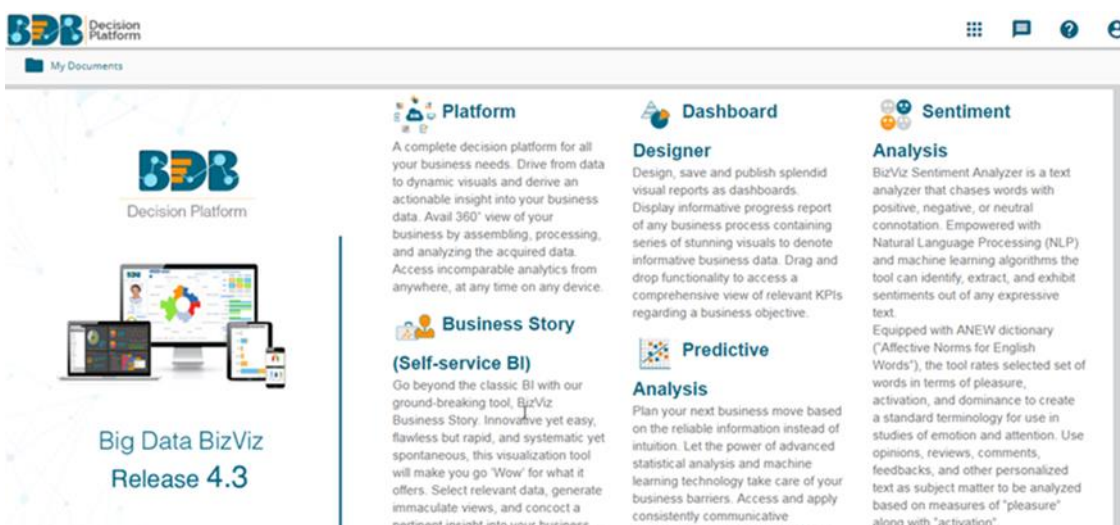

3. Getting Started with the BDB Social Media Browser

BDB Social Media Browser is a plugin application provided under BBD Platform.

- i) Open BDB Enterprise Platform Link: <https://app.bdb.ai>
- ii) Enter your credentials to Login.
- iii) Click the **'Continue'** option.

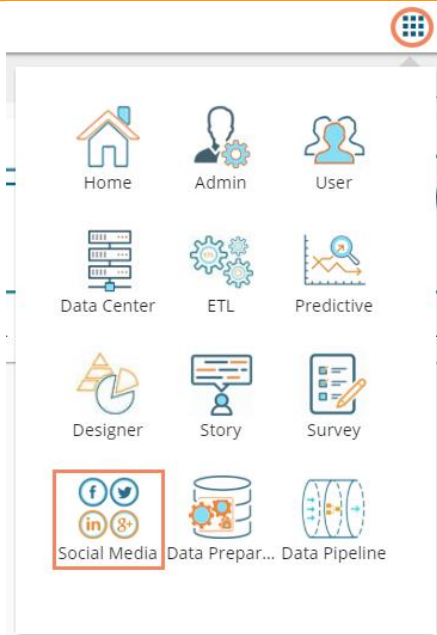

- iv) The homepage of the BDB Platform opens.

Note: The above screen opens only for those newly created users who have not yet created any document using the BDB Platform.

- v) Click on the **'User Menu'**  to display a list of all the available plugins.
- vi) Select the **'Social Media'** plugin from the list.

vii) Landing page for the SMB plugin opens.

viii) Click the **'Social Media Browser'** option provided on the top left side of the page.

Social Media Browser

Welcome to the Social Media Browser

- Create Search Term

1. Click on the + icon
2. Select your source(s) and press the 'Next' arrow
3. Select the desired pages for each source
4. Click on ✓ to save
5. Click on the Preview icon to view the data for that page

- Schedule a Job

1. Click on the + icon

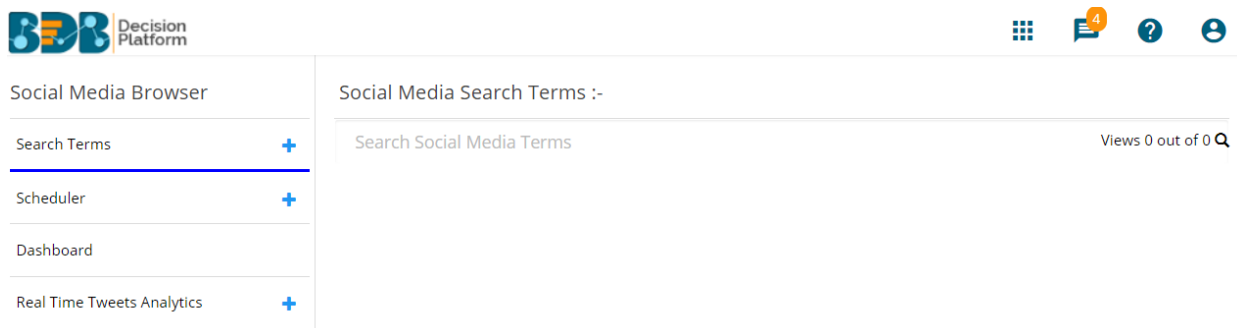

- View Dashboard

Click on the Dashboard icon beside a search term

- Real-time Tweets Analytics

1. Click on the + icon
2. Enter a search term and Hash Tag
3. Click on **Apply**
4. Turn on the streaming toggle

ix) The SMB homepage opens.

3.1. Forgot Password Option

Users are provided with a choice to change the password on the Login page of the platform.

- i) Navigate to the Login page.
- ii) Click '**Forgot your password?**' option.

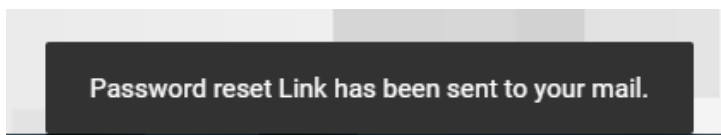

- iii) A new window opens.
- iv) Provide the email id that is registered with BDB to send the reset password link.
- v) Click the '**Continue**' option.

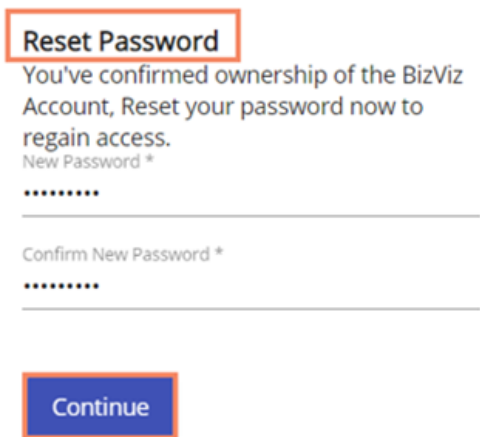

- vi) Users may be redirected to select a space in case of multiple spaces under one server link(They need to select a space and click the 'Continue' option once again). If users do not have multiple spaces

then, a message appears to notify the user that about the password reset link (The users receive the reset link via their registered email.)

- vii) Click the link from your registered email.
- viii) Users get redirected to the **'Reset Password'** page to set a new password.
- ix) Set a new password.
- x) Confirm the newly set password.
- xi) Click the **'Continue'** option.

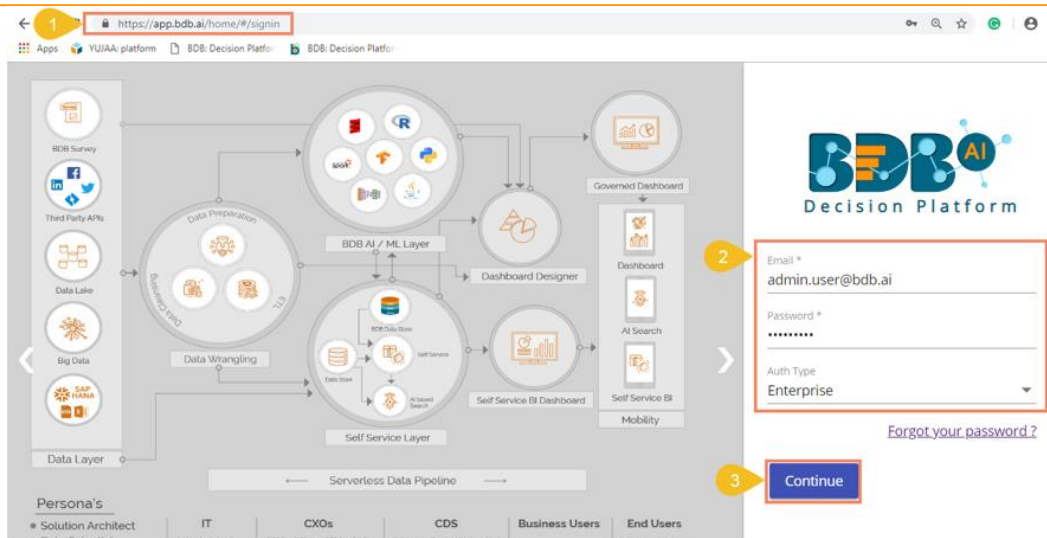

Copyright © 2015-2019 BDB (BizViz Technologies Pvt Ltd)

- xii) The password for the selected BDB account gets reset.

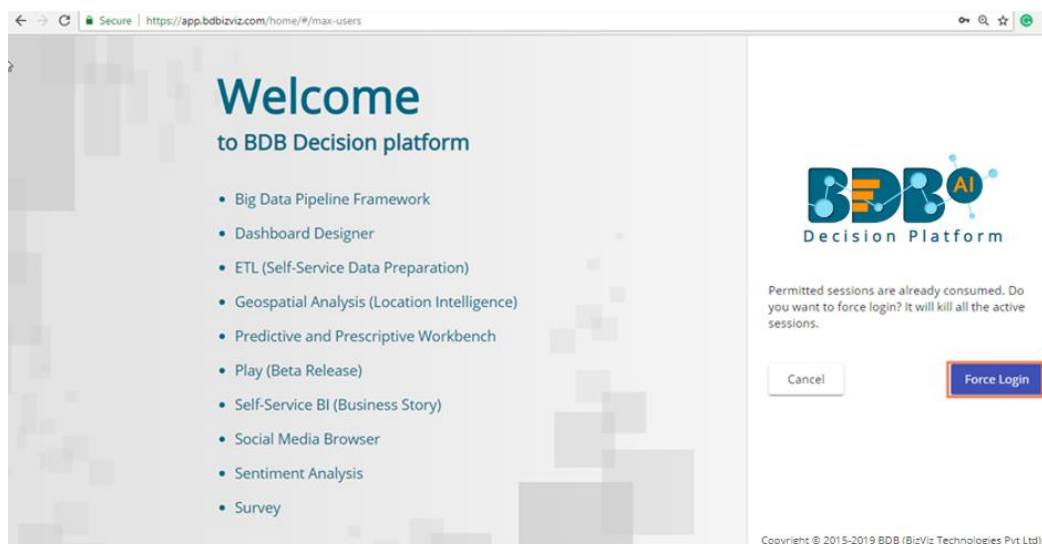

3.2. Force Login

The **'Force Login'** functionality has been introduced to control the number of active sessions up to three. The users can access only 3 sessions at a time when they try to access 4th session a warning message displays to inform that the user has consumed the permitted sessions and a click on the **'Force Login'** would kill all those active sessions.

- i) Navigate to the BDB Platform Login page.
- ii) Enter the valid credentials to log in.
- iii) Click the **'Continue'** option.

- iv) The user gets the following message if the user already consumes the permitted active sessions (3 sessions at a time).
- v) Click the 'Force Login' option.

- vi) A warning message appears that the currently active sessions get killed for the user and the user has redirected to the log in a page of the BDB Platform.

Note: The user can successfully login to the BDB Platform after selecting the 'Force Login' option to log in the platform.

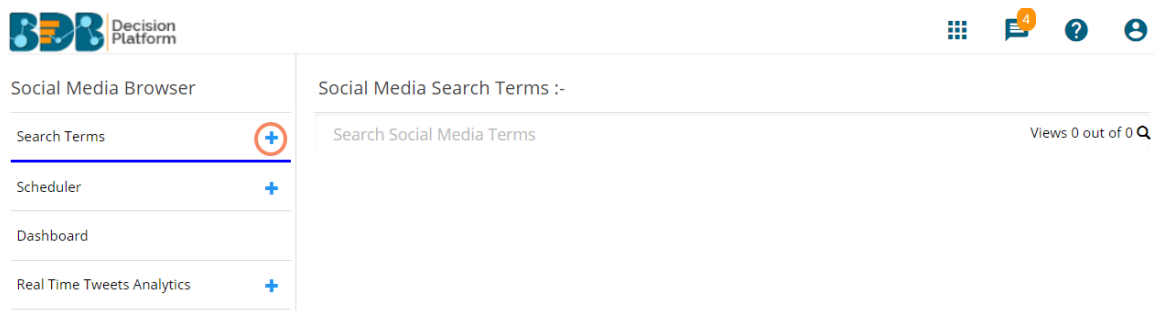

4. Search Terms

This section explains steps to create, edit, and delete a search term using various sources. All the created search terms list on the right side of the SMB homepage.

4.1. Creating a New Search Term

- i) Navigate to the SMB homepage.

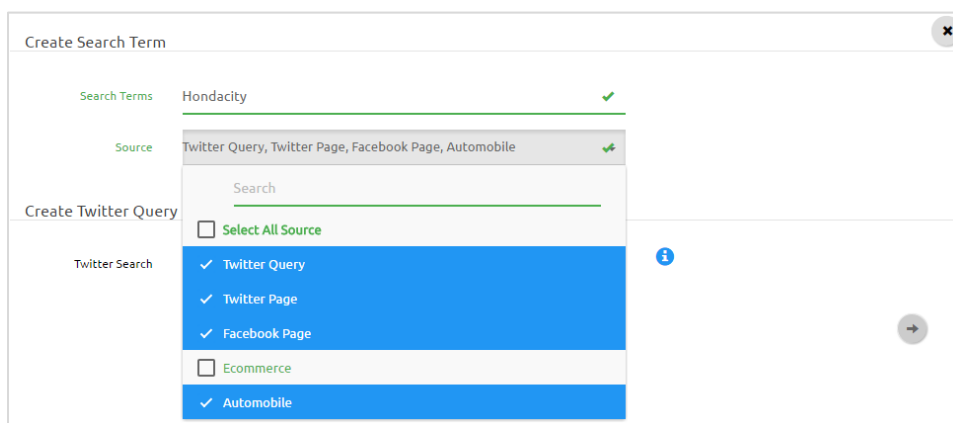

ii) Click the 'Add' + button provided beside the 'Search Terms' option.

iii) The 'Create Search Term' page is launched.

iv) Provide the following information:

- **Search Terms:** Enter a desired search term in the given field
- **Source:** Select a source/sources for the desired search term using a drop-down list

Note:

- Do not enter space or special characters while entering a new search term.
- Users can select multiple sources for a single search term.
 - Choose 'Select All Source' option to select all the available sources from the 'Source' drop-down menu.

4.2. Twitter Query

Twitter Query helps in extracting search term related tweets.

- Select 'Twitter Query' from the 'Source' drop-down menu.
- 'Create Twitter Query' field option launched (on the same page).
- The desired search term is taken in the 'Twitter Search' field by default.
- Click the 'Next' button  to proceed on the next page.

Create Twitter Query

Twitter Search i

→

4.3. Twitter Page(s)

This section lists search term related Twitter pages with the necessary details such as a count of **Twitter Followers**, **Following** and mention of **Verified** category.

- i) Select **Twitter Page** from the **Source** drop-down menu.
- ii) Users get redirected to the **Select Twitter Page** window.
- iii) The **Twitter Page Search** field displays with the desired search term (by default).
- iv) All the available twitter pages regarding the desired search term get listed below.
- v) Use a check mark in the box to select a twitter page from the list (as shown below).
- vi) Click the **Next** button → to proceed on the next page.

Select Twitter Page x

Twitter Page Search Get Page i

Search

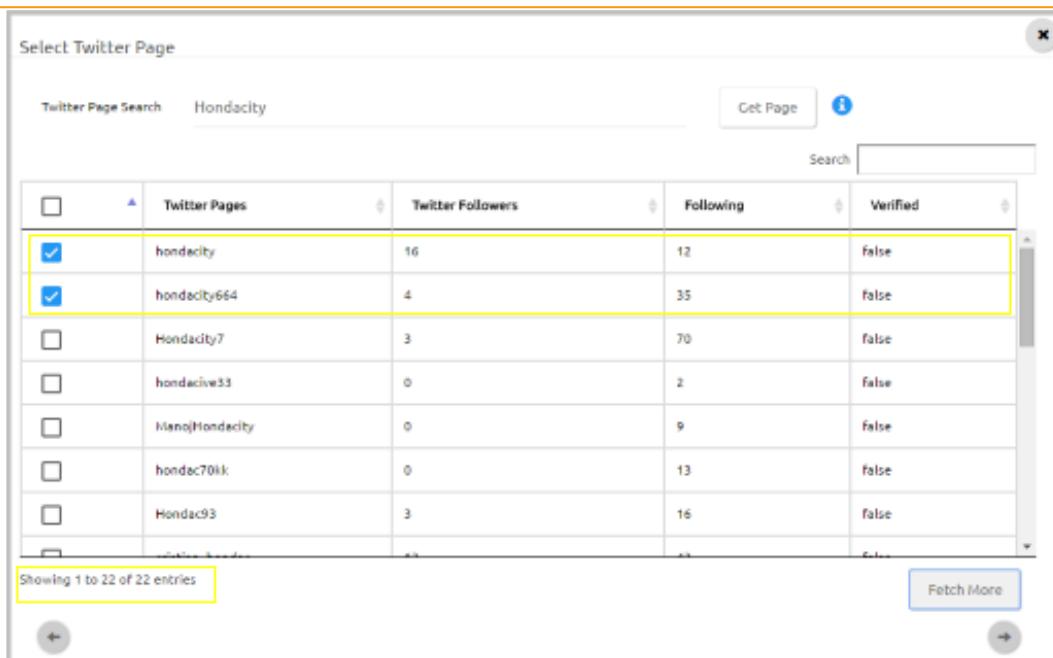

<input type="checkbox"/>	Twitter Pages	Twitter Followers	Following	Verified
<input type="checkbox"/>	hondac100ant	294	1877	false

Showing 1 to 20 of 20 entries Fetch More

←
→

Note:

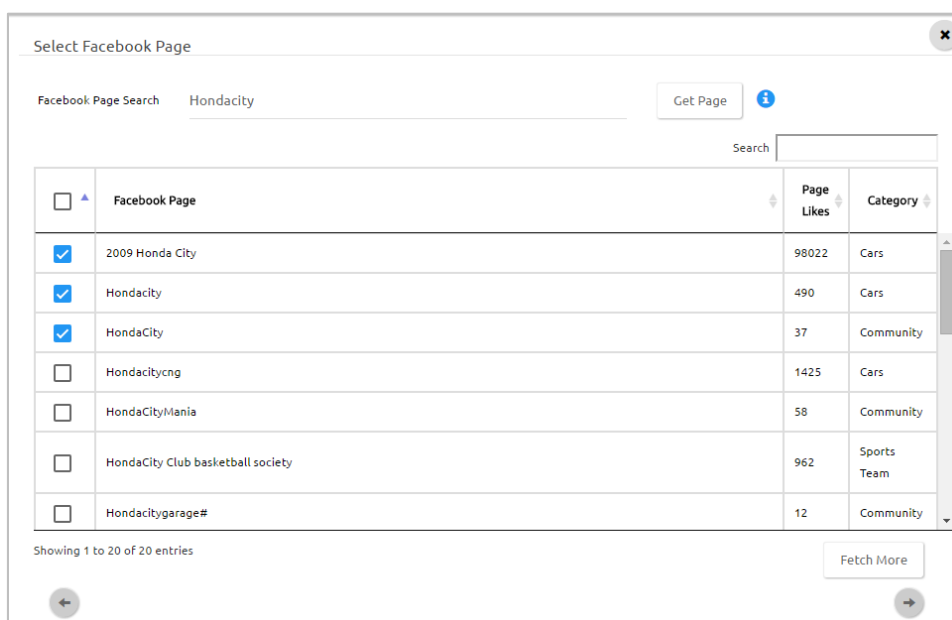

- a. The user can select multiple Twitter Pages for a single search term.
- b. Click the **Get Page** button to search for customized search terms.
- c. Click the **Fetch More** button to display the remaining Twitter pages for the desired search term.
E.g., If 2 Twitter Pages are selected out of the first 20 entries for **'Hondacity'** search term. (Refer the image inserted for 4.3) -> Click on the **'Fetch More'** button -> It displays all the selected pages on the top of the list followed by the remaining pages.
 Hence, out of 22 total displayed entries (Refer to the below-given image) 2 are carried forward/ selected entries from the previous page, and 20 are remaining entries for the desired search term.

4.4. Facebook Page(s)

This section lists search term related Facebook pages with the necessary details such as a count of 'Page Likes' and 'Category.'

- i) Select 'Facebook Page' option from the 'Source' drop-down menu.
- ii) The 'Select Facebook Page' option appears.
- iii) The 'Facebook Page Search' field displays the desired search term (by default).
- iv) All the available Facebook pages pointing the desired search term get listed below.
- v) Use a check mark in the given checkbox to select a Facebook page from the list (as shown below).
- vi) Click the 'Next' button  to proceed on the next page.

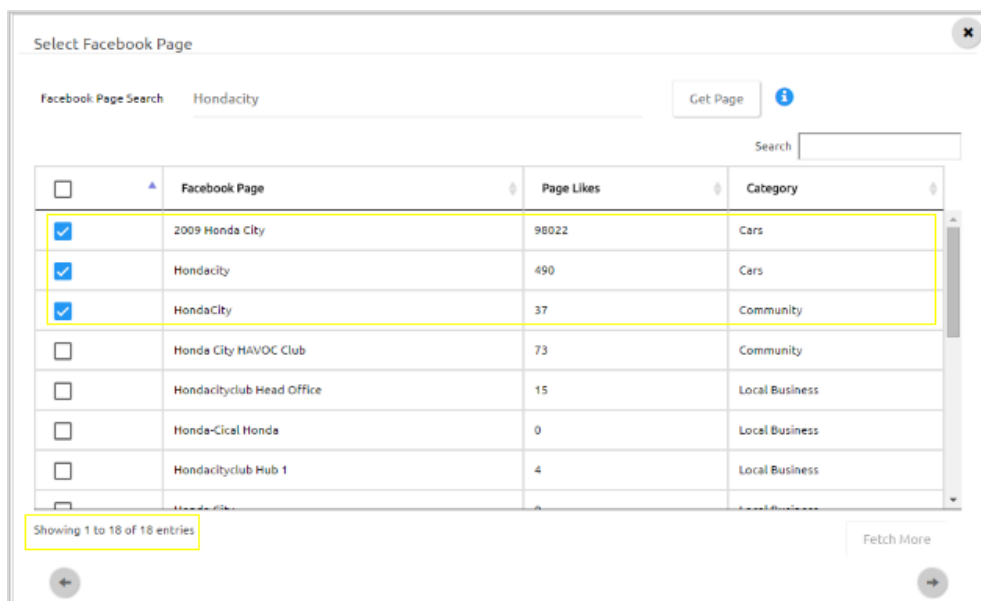

Note:

- a. The user can select multiple Facebook Pages for a single search term.
- b. Click the **'Get Page'** button, when you want to search for customized search terms.
- c. Click the **'Fetch More'** button to display the remaining Facebook Pages (other than first 20 displayed entries) for the desired search term.

E.g., If 3 Facebook Pages are selected out of the first 20 entries for **'Hondacity'** search term. (Refer the image inserted for 4.4). -> Click on the **'Fetch More'** button -> It displays all the selected pages on the top of the list followed by the remaining pages.

Hence, out of 18 total displayed entries (Refer to the below-given image) 3 are carried forward/ selected entries from the previous page, and 15 are the remaining entries for the desired search term.

4.5. E-commerce Sites

BDB Social Media Browser is currently integrated with Amazon and Flipkart e-commerce sites to extract data.

4.5.1. Steps to Configure an E-commerce Site

- i) Navigate to the **'Create Search Term'** page.
- ii) Enter any product name in the **'Search Terms'** field (E.g. **'iPhone5s'** as shown in the below-given image).
- iii) Select **'E-commerce'** as a source from the drop-down menu.
- iv) Click the **'Next'** button to proceed on the next page.

- v) The **'Add E-commerce Sites'** page opens.
- vi) Do the necessary configurations:
 - **Url:** Enter an appropriate URL link for the selected search term from Amazon or Flipkart.
 - Click the **'Add'** option.

Add Ecommerce Sites

Url

- A table displays with the selected URL.

Search

4.5.2. Steps to Delete an E-commerce URL

- Select an E-commerce URL from the list by a check mark in the given checkbox (as shown below)
- Click the **'Delete'** option.

<input type="checkbox"/>	Search Term	Source	Url
<input type="checkbox"/>	iphone5s	amazon	http://www.amazon.in/s/ref=nb_sb_ss_c_0_4?url=search-alias%3Daps&field-keywords=iphone+5s&prefix=lpho%2Caps%2C289
<input type="checkbox"/>	iphone5s	flipkart	http://www.flipkart.com/search?q=iphone+5s&as-on&as-show=on&otracker=start&as-pos=1_q_iphone5s
<input checked="" type="checkbox"/>	iphone5s	amazon	http://www.amazon.in/s/ref=nb_sb_ss_c_0_4?url=search-alias%3Daps&field-keywords=iphone+5s&prefix=lpho%2Caps%2C289

Showing 1 to 3 of 3 entries

iii) Selected E-commerce URL gets removed from the list.

4.6. Automobile Sites

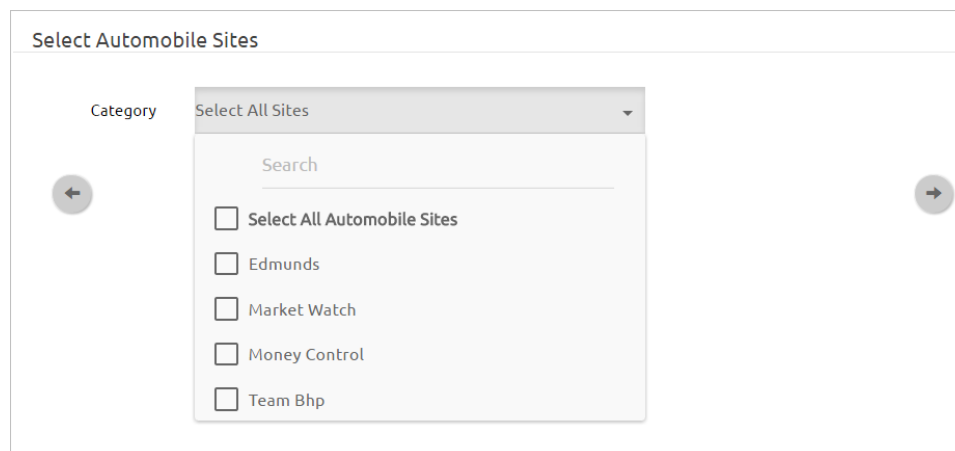

Multiple automobile sites are integrated under this section to extract web data for the desired search term.

Below mentioned Automobile Sites are integrated under this section:

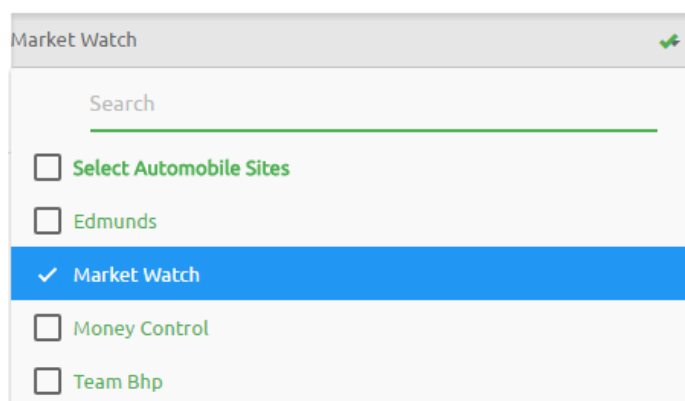

1. Edmund

2. Market Watch
3. Money Control
4. Team-Bhp

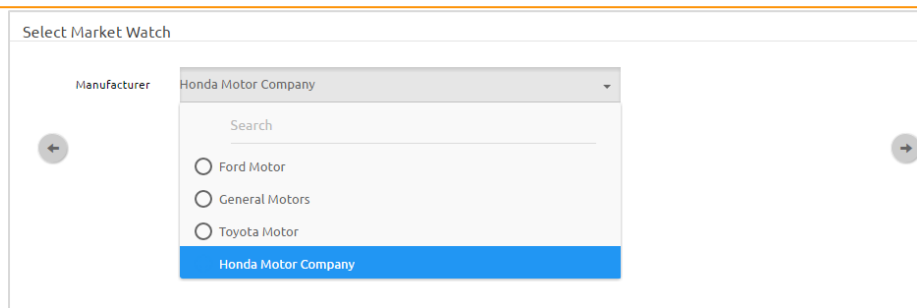

- i) Select '**Automobile**' from the '**Source**' drop-down menu.
- ii) The '**Select Automobile Sites**' page opens.
- iii) Click the '**Category**' field to open a drop-down menu.

- iv) Use a check mark in the box to select an automobile site from the drop-down menu.

- v) Provide the required details for the selected automobile site(s) (as described below):
E.g., The created search term is **Hondacity** in the below mentioned image. If '**Market Watch**' automobile site is selected for this search term then; the user gets directed to select the '**Manufacturer**' option using another drop-down list:

vi) Click the **'Next'** button  to proceed on the next page.

Note:

- a. The user can select multiple automobile sites for a single search term. Choose **'Select All Automobile Sites'** option from the **'Category'** drop-down menu to select all the available sites.
- b. **Option to Schedule a job:** This step appears in continuation to complete the procedure for creating a search term.

This option can be availed after the last source in the sequence of creating a search term is configured.

- i) Click the **'Checkmark'**  button.
- ii) A new window appears to confirm whether the user wants to schedule a search term.
- iii) Click the **'Yes'** option if wish to schedule the search term.

iv) The search term gets scheduled successfully.

4.7. Summary

This section performs two tasks for a search term:

1. Provides Detailed Summary

- i) It displays all the selected sources for a potential search term (As shown in the below-given image).
- ii) Click on the **'Next'** button  from the last source configuration page to open **'Summary'** page.

	SMB_WebScrapper_AWS_nidhi Description : Published from dashboard designer  

Note: All the dashboards are published here by using ‘**BDB Dashboard Designer**’ module.

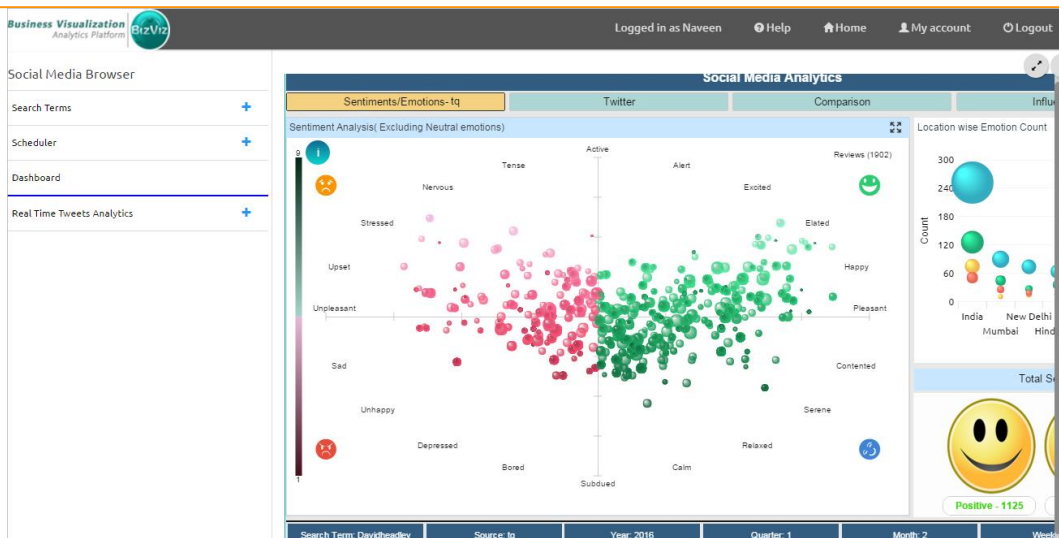

6.2. Searching for a Dashboard

- i) Navigate to the ‘**Analytics Dashboards**’ page.
- ii) Enter the desired dashboard name in the ‘**Search Analytics Dashboards**’ field.
- iii) The desired dashboard appears in the dashboard list given below.

Analytics Dashboards :-
SMB_v2 Views 1 out of 6 🔍
SMB_v2_AWS_nidhi Description : Published from dashboard designer  

6.3. Viewing a Dashboard

- i) Navigate the ‘**Analytics Dashboards**’ page.
- ii) Click the ‘**Dashboard**’  button.
- iii) The selected dashboard opens.

- iv) Click the 'Full Screen' button 
- v) The dashboard opens in the full-screen view.

- vi) Click the 'Close'  button to close the dashboard screen.

6.4. Deleting a Dashboard

- i) Navigate to the 'Analytics Dashboards' page.
- ii) Click the 'Delete' button 
- iii) A pop-up window will appear to confirm the deletion.
- iv) Click the 'Ok' option.

- v) The selected analytical dashboard gets removed from the list.

6.5. Various Dashboards

This section explains available predefined dashboards.

1. SMB Dashboard Version – 1

This dashboard displays search term specific data extracted from Twitter Pages and tweets. It displays extracted data from the **'Automobile Sites.'** Steps to understand the dashboard workflow are as mentioned below:

- i) Click on the **'Search'**  key (**'Search'** key can be accessed only from the full-screen view of the dashboard)
- ii) A drop-down menu opens.
- iii) Select the desired search term from the drop-down menu.
- iv) Select the timeline filter for the desired search term using the **'Timeline'** drop-down menu (if desired).
- v) The **'Analytics'** page opens (by default).
- vi) **'Analytics'** page displays basic analysis for a search term in the below mentioned ways:
 - a. **Year wise Influencer:** This section displays year (on the Y-axis) and count of the total influencer (on the X-axis) through a bar chart.
 - b. **Top 5 #Tags:** This section displays top 5 #tags used for a search term with the mention of the count.
 - c. **Overall Sentiments- Location wise:** This section displays location wise overall sentiments analyzed from the extracted tweets through a bubble chart.
 - d. **Page Followers:** This section displays selected twitter pages with a count of likes and percentage using a pie chart.

- vii) Click the **'Sentiment Map'** tab.
 - a. The current tab positions 20 emotional states, with **'pleasure'** plotted along the horizontal axis and **'activation'** along the vertical axis.
 - b. All individual reviews (tweets) are displayed in the form of circles.

- c. Each circle reveals some information about the review sentiment through the below mentioned parameters:
- **Colour:** Overall valence or pleasure of the review is presented through a color. All the pleasant reviews are colored in green, and unpleasant in red.
 - **Brightness:** Overall arousal of the review is displayed through the brightness of the circle. Active reviews are brighter, and subdued reviews are darker when compared.
 - **Size and Transparency:** These two measures assure assessment of the individual review sentiment. More confident sentiment estimations are presented through the bigger size and less transparency of the circles.

- viii) Click the '**Break Down**' tab.
- The Breakdown chart displays the total number of reviews through different categories of a pie chart.
 - Pleasant reviews are displayed in green color and unpleasant reviews in red.
 - All the reviews are split into four parts as per the revealed sentiments. Each part is indicated through a different shade of color:
 - Relaxed reviews in dark green color
 - Happy reviews in a lighter shade of green color
 - Unhappy reviews in dark red color
 - Upset reviews in a lighter shade of red color
 - Hovering the mouse over a category reveals the total number of reviews that lie in it.

- ix) Click the **'Heat Map'** tab.
- The Heatmap chart displays emotional scatter-plot subdivided into an 8×8 grid of bins representing a one-unit step in pleasure and arousal.
 - The chart displays a number of reviews in various sentiment regions.
 - Each bin is calculated and displayed using a specific color based on the number of reviews that fall under it:
 - Red colored bins contain more review than average
 - Blue colored bins contain less review than average
 - White colored bins contain no reviews.
 - Hovering the mouse over a Heatmap bin reveals the number of reviews that lie in the bin.

- x) Click the **'Tweets'** tab.
- It displays all the available tweets regarding the selected search term.
 - The displayed list also mentions sentiment and source name.
